

## Information Letter for Applicants

Before writing a request letter to apply for our lab, please make sure that you understand and are prepared to meet the following personal qualities that we expect from our members.

1. **Academic Integrity & Work Ethic (職業道德、學術倫理)**：別用 AI 做報告

Plagiarism and the use of unverified information merely to support an argument are extremely harmful in academic research. *Honesty and integrity* are fundamental requirements in our lab.

2. **Autonomy (自主性)**：該投入時間，勿轉嫁因果到他人身上

I have found that much of the research period is often spent correcting misunderstandings or incomplete knowledge acquired earlier. Therefore, you must be willing to *invest time* in strengthening your own knowledge and skills rather than relying excessively on others.

3. **Resilience (韌性)**：頂樓風本來就大，但有比夢想還大嗎？

Solving unsolved problems inevitably involves many challenges and setbacks. Without resilience, it is difficult to reach meaningful research outcomes.

4. **Creativity (創造力)**：持續同一動作有意義嗎？

Reproducing existing work is an essential step for beginners; however, it should not be the final goal. Developing *new ideas* and *contributions* is expected as you progress.

5. **Self-Discipline and Work Efficiency (自律與工作效率)**：別以為別人不知道你打混

Self-discipline and efficient work habits are essential in collaborative research environments. A lack of responsibility or efficiency may *affect* not only individual progress but also the performance of the *entire research group*.

6. **Religious or Political Fanaticism (宗教或政治狂熱)**：經營當下，人間比天堂更有趣

Our lab is dedicated to the *advancement of science and engineering*. Extreme religious or political activism is not aligned with the academic focus of our research environment.

***A diploma reflects qualification, not simply the accumulation of points. You must demonstrate your qualifications through research results.***

(得到學位代表你夠格，非集滿點數。你必須用研究成果證明你夠格)
